

Make Your Own Quatrefoil

A QUATREFOIL is a special shape found all over Louisiana's Old State Capitol! You'll see it on other buildings made during the same time. Look for quatrefoils the next time you visit the Old State Capitol. In the meantime, make one of your own from 4 (quatre is the French word for "4") circles.

Cut out these FOUR circles and glue them on the shape below or on a blank piece of paper to make your own QUATREFOIL!

Do you see where they fit?
